## NEVER GIVE UP HOPE.

Most people have a job. First responders have a calling. It takes guts and determination, but it also takes preparation and the right tools. Pelican can help with the kind of innovations that can give you the edge while working to save a life. Our revolutionary RALS units (Remote Area Lighting Systems) put up to 15 hrs of light on the scene, and kill the noise and fumes of generator based emergency lights. Our rugged cases transport support equipment from defibrillators to portable

X-ray machines, and arrive in mission critical situations ready to work.

Pelican manufactures a broad range of safety approved lights for hazardous areas. If the emergency includes a ruptured gas line or vapors from an open fuel spill, the wrong flashlight could become a source of ignition. We cover medical teams with hand-carry EMS cases and field hospital med chests, as well as portable field desks and foot lockers suitable for emergency command centers.

At Pelican we know first responders never give up. Neither should their gear.
